

Company profile

Hsieh Hsu Machinery Co., has invested the latest technology, professional knowledge and computer production control to manufacture and research the whole plant corrugated board production line since 1980. In order to maximize the quality and efficiency of the manufacturing, we have built the concerning enterprises to have the overall blueprint. And following the past 30 years, we have offered over 400 whole plant production lines to the world. Especially, we are the top sales in Asia.

For the continuing upgrade the after services, Dong Guan Hsieh Hsu built in Guandong Province in 1997, Global Sources Machinery Inc built in Jiangsu Province in 2006, Jiang Xi Hsieh Hsu built in Jiang Xi Province in 2008, and Chong Qing Hsieh Hsu built in Chong Qing City in 2011. That offer the spare parts and regrinding the corrugating roll for doing the maintenance and after services to our customers.

Hsieh Hsu's manufacturing products series classification are based on production speed and paper width:

HH-C120 (120 M/min. fit for the paper width under 1800 mm)

HH-C200 (180 M/min. fit for the paper width under 2000 mm)

HH-C250 (230 M/min. fit for the paper width under 2500 mm)

HH-C300 (270 M/min. fit for the paper width under 2500 mm)

The main units including :

Mill Roll Stand, Single Facer, Preheater, Overhead Bridge Conveyor, Glue Machine, Double Backer, Slitter Scorer, NC Cut-off, Automatic Downstacker, Auto splicers... and so on, the whole Complete plant production line to fit customer's demands.

Besides the above mentioned, in order to have an efficient production control for our customers, we provides a computerized production control system and concerning accessories.

The system on Single Facer, NC Cut-off, Glue machines and Downstackers displays and records their production performance and proceeds automatic order change etc.

The multilateral functions offer customers an integrated system to manufacture the board with efficiency and higher profit.
